Subject: RE: Discussion of preliminary results of OU-4a Phase 1a sampling

Hi Dave,

If possible I think we should try to schedule a call on OU-4a Phase 1a drilling results as soon as possible after the results are in, rather than waiting until August 5-6.

The longer we wait between phases the less likely that field work beyond Phase 1b (if determined necessary) could be accomplished this year. Not that 2 weeks makes a lot of difference, but if there's a chance to make preliminary decisions sooner I prefer that.

Did you solidify your Rio Tinto travel plans? Are you able to make the dinner in Elko on Tuesday night?

Talk to you soon.

Thanks,

Jeryl

Subject: RE: Discussion of preliminary results of OU-4a Phase 1a sampling

Jack,

Thanks for the update.

According to my notes scheduling a call in July before we are next scheduled to meet face to face August 5/6 may be difficult, so may I propose a face-to-face discussion the afternoon of August 5 in Reno or late morning or early afternoon August 6 in Yerington in conjunction with an OU1/OU4 technical meeting?

If we want to split the OU1 and OU4 technical meetings/discussions we could hold an OU1 meeting the afternoon of August 5 in Reno and then have the OU4 discussion at the field office/site in Yerington either late morning or early afternoon of the 6th prior to the evening community meeting.

Please let me know your thoughts, thanks,

David A. Seter, P.E.

Subject: Discussion of preliminary results of OU-4a Phase 1a sampling

Dave, Dante and Jeryl,

I'm told that the majority of the preliminary (un-validated) data from the OU-4a, Phase 1a drilling should be available by early-to-mid July. We will tabulate and distribute to the group. As you have requested, should we try to schedule a day and time to have a conference call to discuss?

Thanks,

-jack
